## Course Overview

---

Cash Management & Banking Operations is a comprehensive professional training course designed to enhance the knowledge and practical capabilities of banking professionals responsible for cash management, operational efficiency, liquidity administration, and banking operations. In today's rapidly evolving financial environment, banks and financial institutions must maintain secure, efficient, and well-controlled cash management processes while ensuring operational excellence, regulatory compliance, and superior customer service. This course provides participants with a thorough understanding of modern cash management practices and the operational frameworks that support effective banking services.

The course examines the strategic role of cash management within retail, corporate, commercial, and treasury banking operations. Participants will explore cash flow management, liquidity planning, vault and branch cash operations, payment processing, reconciliation, settlement, transaction management, and operational controls. The programme emphasizes the importance of integrating sound operational practices with effective cash management strategies to improve financial performance, reduce operational risks, and support organizational resilience.

Participants will also develop practical knowledge of banking operational governance, internal controls, operational risk management, regulatory compliance, fraud prevention, and business continuity. Special attention is given to digital banking technologies, automation, data-driven decision-making, and process optimization, enabling participants to improve operational efficiency while adapting to technological advancements and changing customer expectations.

By combining modern cash management principles with operational best practices, Cash Management & Banking Operations equips professionals with practical tools to optimize liquidity management, strengthen operational performance, enhance transaction accuracy, improve customer service, and support strategic business objectives. The course enables financial

institutions to build efficient, secure, and resilient banking operations that meet evolving regulatory standards and competitive market demands.

## Objectives

---

- Analyze the principles and operational framework of modern cash management and banking operations by the end of the course.
- Apply effective cash management techniques to improve liquidity utilization, operational efficiency, and financial performance during practical exercises.
- Evaluate operational and liquidity risks and implement appropriate control measures to strengthen banking operations.
- Develop cash management strategies that support treasury functions, branch operations, and customer banking services.
- Assess operational performance using measurable key performance indicators and recommend practical improvement initiatives.
- Design operational workflows that improve cash handling, reconciliation, payment processing, and transaction accuracy.
- Improve coordination between treasury, banking operations, finance, compliance, and customer service departments.
- Strengthen operational governance through effective internal controls, regulatory compliance, and fraud prevention practices.
- Implement digital banking technologies and automation to optimize cash management and operational processes.
- Align cash management and banking operations with organizational objectives, regulatory expectations, and international banking best practices.

## Who Should Attend

---

This course is designed for professionals responsible for cash management, banking operations, treasury operations, branch management, financial operations, and transaction processing within banks and financial institutions. It is particularly valuable for cash management managers, treasury professionals, banking operations managers, branch managers, operations supervisors, payment operations specialists, liquidity management professionals, reconciliation officers, and customer service managers involved in operational activities.

The programme also benefits professionals working in finance, operational risk, compliance, internal audit, internal control, financial planning, digital banking, business process improvement, and business continuity. Department heads, senior managers, executives, and decision makers responsible for operational excellence, treasury management, banking transformation, and financial governance will gain practical insights into improving organizational performance through effective cash management and banking operations.

## Learning Outcomes

---

- By the end of this Cash Management & Banking Operations course, participants will be able to:
- Analyze the operational structure of cash management and banking operations within financial institutions.
- Apply modern cash management techniques to optimize liquidity and operational efficiency.
- Manage cash handling, reconciliation, payment processing, and settlement activities effectively.
- Evaluate operational risks and implement internal controls that enhance governance and regulatory compliance.
- Improve transaction accuracy and operational performance through process optimization.
- Apply operational performance indicators to measure efficiency and identify improvement opportunities.
- Strengthen coordination between treasury, operations, finance, and compliance functions.
- Utilize digital banking technologies and automation to improve cash management processes.
- Develop practical initiatives that enhance operational resilience and customer service quality.
- Prepare comprehensive action plans to improve cash management and banking operations within their organizations.

## Course Outline
