Course Overview

Financial Reporting, Disclosure & Corporate Governance is a comprehensive professional training course designed to equip finance professionals, accountants, auditors, corporate governance specialists, compliance professionals, and senior executives with the knowledge and practical skills required to prepare transparent financial reports, implement effective disclosure practices, and strengthen corporate governance frameworks in accordance with International Financial Reporting Standards (IFRS) and internationally recognized governance principles. As regulatory expectations, stakeholder demands, and governance requirements continue to evolve, organizations must ensure that financial reporting and disclosure processes promote transparency, accountability, integrity, and sustainable organizational performance.

High-quality financial reporting and effective corporate governance are fundamental to maintaining investor confidence, supporting regulatory compliance, enhancing organizational reputation, and improving strategic decision-making. Government entities, ministries, public sector organizations, banks, financial institutions, oil and gas companies, listed organizations, and multinational corporations rely on accurate financial reporting and comprehensive disclosure practices to provide stakeholders with reliable financial information while demonstrating responsible governance and effective oversight. Integrating financial reporting with sound governance practices enables organizations to strengthen internal controls, manage risks proactively, and achieve long-term value creation.

Throughout this course, participants will develop practical expertise in preparing financial reports, meeting disclosure requirements, applying IFRS reporting principles, strengthening governance structures, supporting audit committees, managing regulatory compliance, and improving internal control environments. The program explores the relationship between financial reporting, corporate governance, enterprise risk management, ethics, accountability, board oversight, stakeholder communication, and organizational transparency. Practical case studies and real-world examples enable participants to understand how governance and financial reporting work together to improve organizational performance and regulatory compliance.

Designed according to international professional training standards, this course combines financial reporting expertise with governance best practices to support effective leadership and sustainable organizational success. Participants will gain practical tools to improve reporting quality, strengthen governance processes, enhance disclosure practices, support audit readiness, and contribute to better financial decision-making while maintaining compliance with international financial reporting

and corporate governance requirements.

Objectives

- Analyze financial reporting, disclosure, and corporate governance principles and apply them throughout the course.
- Develop the ability to prepare transparent financial reports in accordance with IFRS requirements.
- Evaluate disclosure requirements and implement effective financial communication practices.
- Apply internationally recognized corporate governance principles to strengthen organizational accountability.
- Design governance frameworks that support financial reporting quality, compliance, and stakeholder confidence.
- Improve financial reporting through enhanced disclosure, internal controls, and governance oversight.
- Strengthen professional judgment in evaluating governance risks, ethical considerations, and reporting quality.
- Implement governance practices that support audit readiness, regulatory compliance, and organizational transparency.
- Assess financial reporting risks and recommend governance improvements that enhance reporting integrity.
- Align financial reporting, disclosure, and governance practices with organizational strategy, regulatory expectations, and international best practices.

Who Should Attend

This course is designed for finance directors, financial controllers, chief accountants, financial reporting managers, accounting managers, auditors, governance specialists, compliance officers, internal control professionals, risk managers, finance business partners, and professionals responsible for preparing, reviewing, or overseeing financial reporting and corporate governance activities.

The program is particularly beneficial for professionals working in government entities, ministries, public sector organizations, commercial banks, investment banks, financial institutions, insurance

companies, oil and gas organizations, listed companies, multinational corporations, regulatory authorities, investment firms, and organizations committed to strengthening governance, transparency, and financial reporting quality. Internal auditors, external auditors, regulatory professionals, legal advisors, company secretaries, financial analysts, and ethics officers will also benefit from the practical governance and reporting techniques presented throughout the course.

Chief Financial Officers (CFOs), board members, audit committee members, corporate governance committee members, senior executives, finance executives, strategy managers, business unit leaders, and decision makers responsible for financial governance, regulatory compliance, enterprise risk management, and organizational accountability will gain practical insights into integrating financial reporting and governance practices to improve organizational performance and stakeholder confidence.

Learning Outcomes

- By the end of this course, participants will be able to:
- Interpret IFRS financial reporting and disclosure requirements effectively.
- Prepare transparent financial reports that meet regulatory and stakeholder expectations.
- Apply corporate governance principles to strengthen accountability and organizational oversight.
- Evaluate financial disclosures and improve reporting quality and transparency.
- Assess governance structures and recommend improvements supporting organizational effectiveness.
- Strengthen internal controls that support reliable financial reporting.
- Identify financial reporting and governance risks and recommend appropriate mitigation measures.
- Support audit committees, boards, and senior management through high-quality financial reporting.
- Improve compliance with governance frameworks, regulatory requirements, and international reporting standards.
- Contribute to sustainable organizational performance through integrated financial reporting, governance, and ethical business practices.
