## Course Overview

---

The Strategic Business Management Training Course is a comprehensive professional program designed to strengthen the strategic, managerial, and business leadership capabilities required to manage organizations effectively in complex and changing business environments. The course integrates strategic management, business analysis, decision-making, resource management, performance management, risk management, and strategy execution to provide participants with a practical framework for managing business performance and achieving organizational priorities.

Effective strategic business management requires more than understanding corporate strategy. Managers and business leaders must be able to assess the organization's current position, understand internal capabilities and external market forces, identify strategic priorities, evaluate alternatives, allocate resources, manage risks, and translate strategic decisions into measurable business results. This course provides participants with practical approaches for connecting strategic thinking with day-to-day management and long-term organizational performance.

The program covers the key components of strategic business management, including environmental analysis, strategic positioning, strategic objectives, business development, strategic decision-making, resource alignment, performance management, risk management, stakeholder management, and strategy execution. Participants will explore practical tools and frameworks that support structured analysis, improve management decisions, and strengthen alignment between corporate strategy, business units, departments, and operational functions.

The Strategic Business Management Training Course is designed for government entities, ministries, public sector organizations, banks and financial institutions, oil and gas organizations, and large corporations across different industries. Through practical exercises, case discussions, business scenarios, and an integrated final workshop, participants will develop the ability to apply strategic business management concepts to real workplace challenges and contribute more

effectively to organizational performance and strategic execution.

## Objectives

---

- Analyze the internal and external business environment to identify factors affecting organizational performance and strategic positioning during the course.
- Evaluate the organization's strategic position by identifying strengths, weaknesses, opportunities, threats, business challenges, and strategic priorities.
- Develop strategic objectives and business priorities aligned with organizational vision, mission, strategic direction, and performance requirements.
- Apply strategic management tools to analyze business challenges, opportunities, and management decisions using structured approaches.
- Evaluate strategic alternatives based on feasibility, organizational capabilities, available resources, risks, expected impact, and business priorities.
- Design strategic business initiatives that connect organizational objectives with responsibilities, resources, timelines, and measurable results.
- Improve resource allocation by aligning financial, human, technological, and operational resources with strategic business priorities.
- Develop practical performance measures and key performance indicators to monitor business progress and strategic achievement.
- Apply strategic risk management approaches to identify, assess, prioritize, and address risks that may affect business performance and strategy execution.
- Strengthen alignment between senior management, business units, departments, and functional teams to support effective strategic execution.
- Improve strategic decision-making capabilities in environments characterized by uncertainty, complexity, changing priorities, and incomplete information.
- Develop a practical strategic business management framework that can be applied and adapted to the participant's organizational environment.

## Who Should Attend

---

The Strategic Business Management Training Course is designed for executives, directors, department heads, business unit managers, senior managers, operations managers, business development managers, strategic planning managers, corporate planning professionals, performance management managers, project and program managers, transformation leaders,

governance professionals, and risk management specialists. It is particularly relevant to professionals who participate in strategic decision-making, business planning, resource allocation, organizational development, performance improvement, and strategic initiative management.

The course is suitable for managers and professionals working in government entities, ministries, public sector organizations, banks and financial institutions, oil and gas organizations, industrial companies, commercial organizations, and large service organizations. It is also valuable for business analysts, management consultants, strategic planning specialists, business development professionals, finance managers, human resources professionals, operations specialists, project managers, and functional leaders who need a broader understanding of how their responsibilities contribute to organizational strategy and business performance.

The program is also appropriate for professionals preparing for broader management or leadership responsibilities and experienced managers seeking to strengthen their strategic thinking, business analysis, decision-making, resource management, performance management, risk management, and strategy execution capabilities.

## Learning Outcomes

---

- Analyze the organization's strategic position and identify internal and external factors affecting business performance.
- Apply strategic analysis tools to assess business opportunities, challenges, capabilities, and organizational priorities.
- Define strategic priorities and connect them with organizational vision, mission, objectives, and long-term direction.
- Evaluate strategic alternatives and select appropriate options based on business requirements, resources, risks, and expected outcomes.
- Develop practical business initiatives that are aligned with clearly defined strategic objectives.
- Improve management decision-making through structured analysis, relevant information, and objective evaluation criteria.
- Align financial, human, technological, and operational resources with strategic priorities and business requirements.
- Develop appropriate performance indicators to monitor business results, strategic progress, and organizational performance.

- Identify strategic and operational risks that may affect business initiatives and develop appropriate mitigation approaches.
- Establish mechanisms for coordination and alignment between senior management, business units, departments, and functional teams.
- Evaluate strategic and business performance, identify performance gaps, and recommend appropriate corrective and improvement actions.
- Develop and present a practical strategic business management framework that can be applied to a real organizational challenge.

## Course Outline

---

### DAY 01

## Strategic Business Management Fundamentals and Business Analysis

- Understanding strategic business management and its role in organizational performance
