## Course Overview

---

Supply Chain Finance is a comprehensive professional training course designed to equip banking professionals, trade finance specialists, corporate finance teams, and supply chain leaders with the advanced knowledge and practical skills required to design, implement, and manage Supply Chain Finance solutions that optimize working capital, improve liquidity, and strengthen financial performance. As global supply chains become increasingly interconnected and complex, Supply Chain Finance has become a strategic financial solution that enhances collaboration between buyers, suppliers, and financial institutions while supporting sustainable business growth.

The course provides participants with an in-depth understanding of Supply Chain Finance models, financial structures, and operational frameworks. Participants will explore supplier finance, buyer finance, receivables finance, invoice discounting, reverse factoring, purchase order finance, inventory finance, distributor finance, and other working capital solutions. The program also examines how financial institutions evaluate supply chain risks, structure financing programs, and deliver value-added financial services that improve cash flow and operational resilience.

The program further explores the integration of Supply Chain Finance with Trade Finance, Corporate Banking, Treasury Management, Working Capital Management, Enterprise Risk Management, Credit Risk Management, Regulatory Compliance, Anti-Money Laundering (AML), Financial Technology (FinTech), Digital Transformation, Data Analytics, and Customer Relationship Management. Participants will gain practical insights into designing financing solutions, assessing risks, improving liquidity management, enhancing operational efficiency, and supporting long-term business partnerships across supply chains.

Through interactive workshops, financial modeling exercises, real-world case studies, supply chain financing simulations, working capital analysis, and implementation planning activities, participants will strengthen their ability to develop effective Supply Chain Finance programs that improve

financial performance, reduce financing costs, mitigate operational risks, and create sustainable value for both financial institutions and corporate clients. By the end of the course, participants will be equipped to implement strategic Supply Chain Finance initiatives that enhance competitiveness, strengthen stakeholder relationships, and support organizational growth.

## Objectives

---

- Analyze Supply Chain Finance concepts and evaluate their impact on working capital, liquidity management, and organizational performance by the end of the course.
- Develop comprehensive Supply Chain Finance solutions that address the financing needs of buyers, suppliers, and financial institutions.
- Evaluate supplier finance, buyer finance, receivables finance, invoice discounting, reverse factoring, purchase order finance, and inventory finance models.
- Apply international best practices in structuring and managing Supply Chain Finance programs.
- Design financing solutions that improve cash flow, optimize working capital, and strengthen supply chain resilience.
- Improve strategic decision-making by evaluating financing opportunities, operational risks, and financial performance.
- Strengthen governance through regulatory compliance, AML controls, operational risk management, and credit risk assessment.
- Implement Key Performance Indicators (KPIs) to measure Supply Chain Finance performance, liquidity improvement, operational efficiency, and customer value.
- Assess the role of FinTech, digital platforms, automation, and data analytics in modern Supply Chain Finance solutions.
- Align Supply Chain Finance strategies with corporate banking objectives, treasury management, enterprise risk management, digital transformation, and sustainable organizational growth before course completion.

## Who Should Attend

---

This course is designed for Trade Finance Managers, Corporate Banking Managers, Relationship Managers, Treasury Managers, Credit Managers, Working Capital Managers, Supply Chain Managers, Procurement Managers, Operations Managers, Risk Managers, Compliance Officers, AML Professionals, Product Managers, Financial Analysts, Business Development Managers, Finance Directors, Internal Auditors, and professionals responsible for Supply Chain Finance and

corporate financial solutions.

The program is equally valuable for professionals working in central banks, government agencies, regulatory authorities, multinational corporations, manufacturing companies, logistics providers, import and export organizations, financial institutions, consulting firms, FinTech companies, and decision-makers responsible for liquidity management, operational excellence, trade finance, corporate finance, and strategic financial planning.

## Learning Outcomes

---

- By the end of this course, participants will be able to:
- Design and implement comprehensive Supply Chain Finance programs.
- Evaluate financing requirements across complex supply chains and recommend appropriate financial solutions.
- Apply best practices in working capital optimization and liquidity management.
- Assess operational, credit, and financial risks associated with Supply Chain Finance transactions.
- Strengthen regulatory compliance and AML controls within Supply Chain Finance operations.
- Measure Supply Chain Finance performance using KPIs, financial metrics, and operational indicators.
- Integrate FinTech solutions, digital platforms, and automation into Supply Chain Finance processes.
- Improve collaboration between buyers, suppliers, and financial institutions through structured financing programs.
- Prepare executive reports and financial analyses that support strategic Supply Chain Finance decisions.
- Develop a practical implementation roadmap that strengthens governance, enhances liquidity, improves operational efficiency, reduces financing costs, mitigates risk, and supports sustainable organizational growth.

## Course Outline

---

### DAY 01

## Foundations of Supply Chain Finance

- Introduction to Supply Chain Finance concepts and business value
